S

CONSTANTS

SEQ, head, tail, add

AXIOMS

axm1 :  $\text{SEQ} \subseteq \mathbb{N}_1 \rightarrow S$

axm2 :  $\forall s. s \in \text{SEQ} \Rightarrow (\text{finite}(s) \wedge \text{dom}(s) = 1 .. \text{card}(s))$

axm3 :  $\text{head} \in \text{SEQ} \setminus \{\emptyset\} \rightarrow S$

axm4 :  $\forall s. s \in \text{SEQ} \setminus \{\emptyset\} \Rightarrow \text{head}(s) = s(1)$

axm5 :  $\text{tail} \in \text{SEQ} \setminus \{\emptyset\} \rightarrow \text{SEQ}$

axm6 :  $\forall s. s \in \text{SEQ} \setminus \{\emptyset\} \Rightarrow \text{tail}(s) = (\lambda i. i \in 1 .. \text{card}(s) - 1 | s(i + 1))$

axm7 :  $\text{add} \in \text{SEQ} \times S \rightarrow \text{SEQ}$

axm8 :  $\forall s, e. (s \in \text{SEQ} \wedge e \in S) \Rightarrow \text{add}(s \mapsto e) = \{1 \mapsto e\} \cup$   
 $(\lambda i. i \in 2 .. \text{card}(s) + 1 | s(i - 1))$

THEOREMS

thm1 :  $\forall s. s \in \text{SEQ} \setminus \{\emptyset\} \Rightarrow \text{dom}(\text{tail}(s)) \subseteq \text{dom}(s)$

thm2 :  $\forall s. s \in \text{SEQ} \setminus \{\emptyset\} \Rightarrow (\forall i. i \in \text{dom}(\text{tail}(s)) \Rightarrow \text{tail}(s)(i) = s(i + 1))$
